“Sex” and “gender” are analytically distinct but not independent terms. They should be clearly defined when reporting research results. Sex and gender also interact in important and complex ways (see Analyzing how Sex and Gender Interact). Rarely does an observed difference between men and women involve only sex and not gender, and rarely does gender operate outside of the context of sex.

A fuzzy concept is a concept of which the boundaries of application can vary considerably according to context or conditions, instead of being fixed once and for all. This means the concept is vague in some way, lacking a fixed, precise meaning, without however being unclear or meaningless altogether. It has a definite meaning, which can be made more precise only through further elaboration ...
