The Wolff-Chaikoff effect, discovered by Drs. Jan Wolff and Israel Lyon Chaikoff at the University of California, is a presumed reduction in thyroid hormone levels caused by ingestion of a large amount of iodine. In 1948, Wolff and Chaikoff reported that injection of iodine in rats almost completely inhibited organification (thyroglobulin iodination) in the thyroid gland.

Wolff-Chaikoff effect - Wikipedia

Psychoactive drugs are a class of chemical substances that act on the central nervous system and can alter behavior and cognition. All psychoactive drugs are highly fat-soluble and thus cross the blood-brain barrier readily.

General anaesthetics (or anesthetics, see spelling differences) are often defined as compounds that induce a loss of consciousness in humans or loss of righting reflex in animals. Clinical definitions are also extended to include the lack of awareness to painful stimuli, sufficient to facilitate surgical applications in clinical and veterinary practice.

Benzodiazepines are a class of drugs primarily used for treating anxiety, but they also are effective in treating several other conditions. The exact mechanism of action of benzodiazepines is not known, but they appear to work by affecting neurotransmitters in the brain, chemicals that nerves release in order to communicate with other nearby nerves.. One of these neurotransmitters is gamma ...

ILEUS IS DEFINED in Dorland's Illustrated Medical Dictionary simply as "obstruction of the intestines." 1 However, the definition of postoperative ileus, the topic of this review, is a bit less clear. In 1990, Livingston and Passaro 2 defined ileus as "the functional inhibition of propulsive bowel activity, irrespective of pathogenetic mechanisms." They further defined postoperative ileus as ...
