How Much Cement Do I

Quickly calculate concrete slab and footing pours by entering the depth, width and length to find the number of cubic yards or bags of concrete needed for your project. Give these calculations to your ready-mix supplier or use them to estimate how many 40, 60 or 80 lb. bags of concrete to buy.

Concrete Calculator - How Much Concrete Do You Need?

CONCRETE CALCULATOR - How Much Do I Need? You can use this concrete calculator to help you determine the number of bags of QUIKRETE® Concrete Mix, Mortar Mix, or Fast-Setting Concrete you will need for the following projects.

Concrete Calculator - How Much Do I Need? | QUIKRETE ...

Calculating how much concrete you need for a project is simply a matter of math. You just need to know some basic geometry formulas and then plug your measurements into the formula. The only tools you need for this part of the project are a measuring tape, calculator, pencil and paper. You can take...

How Do I Calculate How Much Concrete I Need? | Hunker

The best way to calculate how much concrete you're going to need in cubic yards is to do the following: Mark the area that will need concrete and divide it into smaller areas. Calculate the volume of the area after determining the shape of the area (see the chart below) by multiplying in the thickness of the concrete.

2019 Concrete Calculator | Concrete Estimator | How Much ...

For example, let's calculate how much concrete is needed for a 5-inch thick rectangular driveway, 60-feet long (length) and 18-feet wide (width). The area of the driveway is 1,080 square feet (60-feet x 18-feet). According to the table above, one cubic yard of concrete placed at a thickness of 5-inches covers 65 square feet.

Concrete Calculator - Schmitz Ready Mix

Our concrete calculator allows you to accurately work out the amount of concrete you'll need for your project. Simply add the measurements for your concrete order to the relevant shapes above (you only have to fill in the shape/s you want to use) You can build up a concrete calculation for complicated areas by adding additional shapes of each type.

Concrete Calculator | Volume Calculator | Concrete2you

The tables below give you estimates for the number of 50- or 60-lb bags you need for concrete slabs of various sizes. Remember: Before beginning any excavation, call 811 to check for underground utilities. Moving and maneuvering bags of concrete mix takes significant effort. Enlist a helper.

Concrete Slab: How Many Bags of Concrete Mix Do I Need?

How much concrete do I need? Concrete volume = hole volume - post volume = 1.03 - 0.26 = 0.77 cubic feet per post hole. How many bags of concrete do I need? $0.77 \div 0.6 = 1.3$ 80 pound bags of concrete per post hole. Complex Areas Curved Walkway Concrete Calculation. Complex areas can be broken down into small sections.

How Many Bags Of Concrete Do I Need: How Much Concrete Do ...

This means the "density" of concrete is about 145 lbs per cubic foot. Now that we have that information we can calculate the yield. Add up both the dry material in the bag (80 lbs) and the water it takes to mix it up (1 gallon which weighs 8.3 lbs) for a total weight of 88.3 lbs.

How Much Concrete Do I Need? | Sakrete

Cement is much more expensive than sand or gravel. For this reason, the amount of sand and gravel or aggregates in the concrete is maintained at around 60 to 80 percent of the total volume. However, the quantities used to affect the product.
