One of the most versatile and remunerative techniques for handling biodegradable solid wastes is composting. A large variety of such wastes of plant, animal, and synthetic origins can be gainfully composted, at scales varying from a household bin to a large industry. Compost also has an inexhaustible market as a soil conditioner and fertilizer.

ESME version C tests energetically at 3300 -- making it a valuable supplement to use to kill cancer cells. (If you need to avoid any swelling of a tumor, do not use ESME version C as it would kill too many cancer cells, and the immune system -- using inflammation to get rid of the killed cells -- would ultimately swell up the tumors with the inflammation.
