General relativity (GR) is a theory of gravitation that was developed by Albert Einstein between 1907 and 1915, with contributions by many others after 1915. According to general relativity, the observed gravitational attraction between masses results from the warping of space and time by those masses.

The Age of Discovery, or the Age of Exploration (approximately from the beginning of the 15th century until the end of the 18th century), is an informal and loosely defined term for the period in European history in which extensive overseas exploration emerged as a powerful factor in European culture and which was the beginning of globalization. It also marks the rise of the period of ...

Autoritätsdusel ist der größte Feind der Wahrheit. Unthinking respect for authority is the greatest enemy of truth. Letter to Jost Winteler (1901), quoted in The Private Lives of Albert Einstein by Roger Highfield and Paul Carter (1993), p. 79. Einstein had been annoyed that Paul Drude, editor of Annalen der Physik, had dismissed out of hand some criticisms Einstein made of Drude's electron ...

Physics. In the realm of physics, remarkable contributions have been made by Indian scientists. Some hint at the theory may be contained in the views of Uddalaka Aruni, preserved in the Chandogya Upanishad. Uddalaka says: "matter was at first a chaotic mass, like the juices of various trees indiscriminately blended together in honey.

Biology is often approached on the basis of levels that deal with fundamental units of life. At the level of molecular biology, for example, life is regarded as a manifestation of chemical and energy transformations that occur among the many chemical constituents that compose an organism. As a result of the development of increasingly powerful and precise laboratory instruments and techniques ...
