

Perspectives In Brain Research

Perspectives In Brain Research

Attending the 2019 SOT Annual Meeting and ToxExpo in Baltimore? Stop by Booth #3426 to meet our editors.. Sally Darney, Windy Boyd, Hui Hu, and Kristin Inman are representing EHP at SOT this year. Read more...

Environmental Health Perspectives

Beliefs are based on four key components—perceptions, emotions, cognitions, and social interactions—which are also deeply interconnected. These components all intersect in the workings of the human brain, which enables us to have all of our beliefs.

Research — Andrew Newberg

Immune processes have a vital role in CNS homeostasis, resilience and brain reserve. Our cognitive and social abilities rely on a highly sensitive and fine-tuned equilibrium of immune responses ...

Immunoneuropsychiatry — novel perspectives on brain ...

The beginning of the Anthropocene is a subject of heated debate among geologists, anthropologists, and others in the scientific community. In order for the Anthropocene to become officially recognized as a geological epoch by the International Commission on Stratigraphy, a start date must be recognized that is global and can be defined stratigraphically by biological, chemical, or other types ...

The Age of Humans: Evolutionary Perspectives on the ...

Psychology is the scientific study of how we think, feel and behave. In this lesson, you'll get an overview of the five major perspectives that have guided modern psychological research. Why do you act the way you do?

5 Major Perspectives in Psychology - Mr. McNabb

1. Introduction. Since its inception in 1988 (first issue in 1990), the mission of The Leadership Quarterly (LQ) has been to sustain and catalyze the development of innovative, multi-disciplinary research that advances the leadership field. Nearly 25 years later, this goal, along with many of the journal's other primary objectives, has been reached (Gardner, Lowe, Moss, Mahoney, & Coglisier, 2010).

Leadership theory and research in the new millennium ...

The applications of modern artificial intelligence (AI) algorithms within the field of aging research offer tremendous opportunities. Aging is an almost universal unifying feature possessed by all living organisms, tissues, and cells.

Artificial intelligence for aging and longevity research ...

Ontario as a world leader in brain research, commercialization and care. We realize this through convergent partnerships between researchers, clinicians, industry, patients, and their advocates to foster discovery and deliver innovative products and services that improve the lives of those living with brain disorders.
