Sustainable living describes a lifestyle that attempts to reduce an individual's or society's use of the Earth's natural resources, and one's personal resources. Its practitioners often attempt to reduce their carbon footprint by altering their methods of transportation, energy consumption, and/or diet. Its proponents aim to conduct their lives in ways that are consistent with sustainability ...

Today, break rooms at South Sacramento are strictly for breaks. Nurses on incoming shifts — which now overlap outgoing shifts by 30 minutes — get updates via the Nurse Knowledge Exchange (NKE), a KP innovation, which combines user-friendly electronic record-keeping with a seamless personal handoff of each patient from one caregiver to the next.

Feminism and Race in the United States. This article traces the history of U.S. mainstream feminist thought from an essentialist notion of womanhood based on the normative model of middle-class white women's experiences, to a recognition that women are, in fact, quite diverse and see themselves differently.

In Galileo's time-- science began using man's most reliable truth detector---- "Repeatable published physical measurements of the thing under study coupled with vigorous technical debate using a common language called mathematics". It works! A popular example of it working is forensic medicine in law enforcement. Compare today with technology with 50 years ago.

What causes the fresh smell we experience just before the onset of a storm or shower of rain, which is especially noticeable after an extended dry spell?

### **Last Word Archive | New Scientist**

1. Introduction. Road vehicle emissions are one of the most important sources of human exposure to air pollution. Depending on pollutant, mode of travel, travel distance etcetera, the exposure while commuting during rush hours along densely trafficked corridors may constitute a substantial fraction of the total daily exposure (e.g. Hänninen et al., 2004, Barrett et al., 2008, Dons et al., 2012).
