### **What Colour Is A Rainbow**

A rainbow is an arc of colour in the sky that can be seen when the sun shines through falling rain. The pattern of colours start with red on the outside and changes through orange, yellow, green, blue, indigo, to violet on the inside. Sometimes a second, larger, dimmer rainbow is seen. A rainbow is created when white light is bent while entering a droplet of water, split into separate colours ...

The rainbow rose is a rose that has had its petals artificially coloured. The method exploits the rose's natural processes by which water is drawn up the stem. By splitting the stem and dipping each part in different coloured water, the colours are drawn into the petals resulting in a multicolored rose.
