BY: NANCY MORGAN, RN, BSN, MBA, WOCN, WCC, CWCMS, DWC What exactly is wound exudate? Also known as drainage, exudate is a liquid produced by the body in response to tissue damage. We want our patients' wounds to be moist, but not overly moist. The type of drainage can tell us what's going on in a wound. Let's look at the types...

A bite-wound abscess forms when the body fails to clear germs and damaged tissue after a cat is bitten (by another cat or any other animal). An abscess is painful and can cause fever and tiredness until the infection is cleared up, which typically requires antibiotics and possibly surgery, depending on the size and severity of the infection.
